✨ Grade 1 Maths — Maths Stories ✨

Name: Demo Grade 1 **Date:** 26/11/2026

Let's think it through together!

1. A pet shop has **11** goldfish and **13** guppies in one tank. How many fish are in the tank altogether?

2. A craft shop had **13** balls of wool on the shelf. **9** balls were bought for a knitting class. How many balls of wool are left?

3. Liam found **11** smooth stones and **5** shiny shells on the beach. How many things did he collect in total?

4. A box had **20** party hats. **7** party hats were handed out. How many party hats are left in the box?

5. A science class grew **5** bean plants and **9** pea plants for an experiment. How many plants did they grow in total?

6. A print shop had 11 posters ready for the fair. 6 posters were picked up early. How many posters are left?

7. A bee farm has 7 beehives near the orchard and 14 beehives near the meadow. How many beehives are there in total?

8. A vet clinic treated 12 birds and 9 rabbits this week. How many animals did the clinic treat in total?

9. A garden had 11 butterflies visiting the flowers. 2 butterflies flew away. How many butterflies are left?

10. Lily drew 15 stars and 14 hearts on her poster. How many shapes did she draw in total?

You did it — great work!
