# ✨ Grade 2 Maths — Chance ✨

**Name:** Demo Grade 2 **Date:** 26/11/2026

Let's think it through together!

1. A bag has 5 yellow counters and 9 green counters. If you pick one without looking, which colour are you more likely to pick?

2. A bag has 17 counters in total. 8 of them are green and the rest are blue. How many blue counters are there?

3. Is this certain, likely, unlikely, or impossible: A fish will grow legs and walk?

4. A bag has 3 blue counters and 7 yellow counters. If you pick one without looking, which colour are you more likely to pick?

5. A bag has 2 yellow counters and 7 green counters. If you pick one without looking, which colour are you less likely to pick?

6. A bag has 11 counters in total. 5 of them are yellow and the rest are green. How many green counters are there?

7. A bag has 10 yellow counters and 9 green counters. If you pick one without looking, which colour are you more likely to pick?

8. A bag has 1 green counters and 4 blue counters. If you pick one without looking, which colour are you more likely to pick?

9. Is this certain, likely, unlikely, or impossible: It will rain at some point this year?

10. Is this certain, likely, unlikely, or impossible: A cat will fly without any help?

You did it — great work!
