✨ Grade 2 Maths — Mass ✨

Name: Demo Grade 2 **Date:** 26/11/2026

Let's think it through together!

1. How many grams is 7 kg?

2. A bag of potatoes weighs **22** kg in total. If it is cut into two equal halves, how much does each half weigh, in kg?

3. A sack of flour weighs **14** kg in total. If it is cut into two equal halves, how much does each half weigh, in kg?

4. How many kilograms is 9000 g?

5. Box A weighs 25 kg, Box B weighs 38 kg, and Box C weighs 11 kg. Which box is lightest?

6. A dog weighs **31** kg. A hamster weighs **47** kg. What is their total weight, in kg?

7. How many grams is 8 kg?

8. A bag of rice weighs **10** kg in total. If it is cut into two equal halves, how much does each half weigh, in kg?

9. How many kilograms is 2000 g?

10. A schoolbag weighs **20** kg in total. If it is cut into two equal halves, how much does each half weigh, in kg?

You did it — great work!
