✨ Grade 3 Maths — Angles Foundations ✨

Name: Demo Grade 3 **Date:** 26/11/2026

Let's think it through together!

1. Angle A measures 120° and Angle B measures 150°. Which angle is smaller, in degrees?

2. How many right angles does a book cover have?

3. An angle measures 100°. Is it acute, right, obtuse, or straight?

4. How many right angles does a square have?

5. How many right angles does a door frame have?

6. An angle measures 135°. Is it acute, right, obtuse, or straight?

7. How many right angles does a right triangle have?

8. An angle measures 90°. Is it acute, right, obtuse, or straight?

9. A right angle is 90°. An angle measures 30°. How many more degrees would it need to become a right angle?

10. An angle measures 150°. Is it acute, right, obtuse, or straight?

You did it — great work!
