# ✨ Grade 6 Maths — Mean & Data Analysis ✨

**Name:** Demo Grade 6 **Date:** 26/11/2026

1. Find the mean of this data set: 12, 5, 18, 34, 11

2. A data set is 39, 17, 32, 9, 3 (mean = 20). A new value of 16 is added. What is the new mean?

3. Find the mean of this data set: 7, 27, 24, 26, 21

4. Team A's scores: 18, 37, 30, 27, 24. Team B's scores: 36, 9, 4, 19, 9. Which team has the higher mean score?

5. Team A's scores: 38, 9, 13, 40, 28. Team B's scores: 6, 3, 28, 36, 10. Which team has the higher mean score?

6. Find the mean of this data set: 19, 35, 33, 25, 13

7. Find the mean of this data set: 16, 30, 22, 27, 20

8. Team A's scores: 11, 33, 36, 35, 26. Team B's scores: 28, 34, 24, 8, 37. Which team has the higher mean score?

9. Team A's scores: 5, 12, 21, 22, 14. Team B's scores: 40, 27, 6, 39, 3. Which team has the higher mean score?

10. A data set is: 6, 6, 8, 10, 6, 58. One value is much bigger than the rest. Which measure is most affected by this outlier: the mean or the median?
