✨ Grade 6 English — Argument Structure ✨

Name: Demo Grade 6 **Date:** 26/11/2026

1. Answer both (separate your two answers with a comma). 1) What should you do if your evidence does not fully support your claim? 2) Should an argument include multiple pieces of evidence for a single reason?

2. Answer both (separate your two answers with a comma). 1) What should each piece of evidence in an argument directly relate to? 2) What is it called when an argument fails to provide logical support for its claim?

3. Answer both (separate your two answers with a comma). 1) What is it called when a reason directly supports the main claim? 2) What is it called when a writer's conclusion goes further than what the evidence actually supports?

4. Answer both (separate your two answers with a comma). 1) What is the term for a logical error that weakens an argument? 2) What is the statement a writer is trying to prove called?

5. Answer both (separate your two answers with a comma). 1) What should you check about the source of a piece of evidence? 2) What is it called when a writer's conclusion goes further than what the evidence actually supports?

6. Answer both (separate your two answers with a comma). 1) What is it called when an argument assumes something is true without proving it? 2) Should a claim be specific and clearly stated, or vague and general?

7. Answer both (separate your two answers with a comma). 1) What should a writer do before presenting their claim in a formal argument? 2) What is the term for the underlying assumption that connects evidence to a claim?

8. Answer both (separate your two answers with a comma). 1) What is it called when a reason is only loosely connected to the main claim? 2) What is it called when an argument fails to provide logical support for its claim?

9. Answer both (separate your two answers with a comma). 1) What is the term for evidence based on personal experience rather than research? 2) What is it called when an argument only presents one side of an issue?

10

Answer both (separate your two answers with a comma). 1) Why is anecdotal evidence generally considered weaker than statistical evidence? 2) What is it called when a writer uses expert opinions to support a claim?
