✨ Grade 6 English — Main Idea & Supporting Details ✨

Name: Demo Grade 6 **Date:** 26/11/2026

1. Answer both (separate your two answers with a comma). 1) Read: "Urban green spaces reduce air pollution, lower city temperatures, and improve residents' mental health." What is the main idea? — "Urban green spaces provide multiple benefits to city life" or "Parks are only useful for recreation"? 2) Read: "Coral reefs support a quarter of all marine species, protect coastlines from erosion, and provide income for millions through fishing and tourism." What is the main idea? — "Coral reefs provide vital ecological and economic benefits" or "Coral reefs are found only in the Pacific Ocean"?

2. Read: "Regular physical activity strengthens the heart, improves mood through the release of endorphins, and helps maintain a healthy weight over time." What is the main idea? — "Exercise offers wide-ranging physical and mental health benefits" or "Only professional athletes need to exercise"?

3

Answer both (separate your two answers with a comma). 1) Read: "Ants can lift objects up to 50 times their body weight and build complex underground colonies with specialised roles for each member." What is the main idea? — "Ants are remarkably strong and highly organised insects" or "Ants only live in hot climates"? 2) Read: "Solar and wind energy produce electricity without releasing greenhouse gases, making them crucial tools in reducing the effects of climate change." What is the main idea? — "Renewable energy helps address the challenges of climate change" or "Solar panels work best in cloudy weather"?

4

Answer both (separate your two answers with a comma). 1) Read: "The printing of newspapers allowed information to reach ordinary citizens quickly, helping shape public opinion on major events." What is the main idea? — "Newspapers helped spread information and shape public opinion" or "Newspapers were only read by wealthy citizens"? 2) Read: "Antibiotic resistance occurs when bacteria evolve to survive medicines designed to kill them, making some infections increasingly difficult to treat." What is the main idea? — "Antibiotic resistance is a growing challenge for modern medicine" or "All bacteria are resistant to every antibiotic"?

5

Answer both (separate your two answers with a comma). 1) Read: "Regular physical activity strengthens the heart, improves mood through the release of endorphins, and helps maintain a healthy weight over time." What is the main idea? — "Exercise offers wide-ranging physical and mental health benefits" or "Only professional athletes need to exercise"? 2) Read: "Space exploration has led to advances in technology, from satellite communication to medical imaging, that benefit life on Earth every day." What is the main idea? — "Space exploration has produced valuable benefits beyond space itself" or "Only astronauts benefit from space exploration"?

6

Answer both (separate your two answers with a comma). 1) Read: "Ancient Egyptian society was highly organised, with a complex system of government, religion, and engineering that produced the pyramids." What is the main idea? — "Ancient Egypt achieved remarkable organisation and engineering" or "The pyramids were built entirely by machines"? 2) Read: "Sharks play a crucial role as apex predators, keeping fish populations balanced and coral reef ecosystems healthy." What is the main idea? — "Sharks help maintain balance in ocean ecosystems" or "Sharks are dangerous to every swimmer"?

7. Answer both (separate your two answers with a comma). 1) Read: "Solar and wind energy produce electricity without releasing greenhouse gases, making them crucial tools in reducing the effects of climate change." What is the main idea? — "Renewable energy helps address the challenges of climate change" or "Solar panels work best in cloudy weather"? 2) Read: "Ocean currents distribute heat around the globe, influence weather patterns, and support marine ecosystems by carrying nutrients." What is the main idea? — "Ocean currents play a vital role in climate and marine life" or "Ocean currents remain the same temperature everywhere"?

8. Read: "Earthworms aerate soil as they burrow, recycle nutrients by breaking down organic matter, and improve drainage for plant roots." What is the main idea? — "Earthworms provide several important benefits to soil health" or "Earthworms only live in tropical rainforests"?

9. Answer both (separate your two answers with a comma). 1) Read: "The discovery of penicillin revolutionised medicine by providing the first effective treatment against many previously fatal bacterial infections." What is the main idea? — "Penicillin transformed the treatment of bacterial infections" or "Penicillin was discovered by accident in a hospital"? 2) Read: "Volcanic soil is often extremely fertile, which is why so many farming communities have settled near active volcanoes for centuries." What is the main idea? — "Volcanic soil benefits are why farmers settle near volcanoes" or "All volcanoes are too dangerous to live near"?

10

Answer both (separate your two answers with a comma). 1) Read: "Ancient Rome's network of roads, some still used today, allowed the empire to move armies, trade goods, and communicate across vast distances." What is the main idea? — "Rome's road network was essential to running its vast empire" or "All Roman roads have completely disappeared"? 2) Read: "Wetlands filter pollutants from water, reduce the impact of flooding, and provide breeding habitats for countless species of birds and fish." What is the main idea? — "Wetlands provide crucial environmental services" or "Wetlands are always dry during summer"?
