# ✨ Grade 7 English — Compare & Contrast ✨

**Name:** Demo Grade 7 **Date:** 26/11/2026

1. Answer both (separate your two answers with a comma). 1) Two editorials about the same election reach opposite conclusions. Can opinion pieces disagree even on the same facts? 2) One review calls a film "a masterpiece" and another calls it "a disaster". Do critics always agree?

2. Answer both (separate your two answers with a comma). 1) A poem and a newspaper article both describe a sunset. Which uses more figurative language? 2) A politician's campaign speech and a fact-checking website's article both discuss the same policy claim. Which is more likely to only present one side?

3. Answer both (separate your two answers with a comma). 1) A textbook diagram and a cartoon both explain how a volcano erupts. Which is more likely to be scientifically precise? 2) A politician's campaign speech and a fact-checking website's article both discuss the same policy claim. Which is more likely to only present one side?

4

Answer both (separate your two answers with a comma). 1) A textbook diagram and a cartoon both explain how a volcano erupts. Which is more likely to be scientifically precise? 2) A customer's five-star review on a retailer's own site and a review on an independent comparison site both discuss the same headphones. Which is more likely to be influenced by the seller?

5

Answer both (separate your two answers with a comma). 1) A product's official instruction manual and a user-made video tutorial both explain how to assemble the same furniture. Which is more likely to have been checked by the manufacturer for accuracy? 2) A diary entry written the night of an event and a historian's account written fifty years later both describe the same event. Which reflects how it felt in the moment, before later events were known?

6

Answer both (separate your two answers with a comma). 1) An encyclopedia entry and a single blog post both explain the same historical event. Which is more likely to have been reviewed by multiple editors before publishing? 2) A raw transcript of an interview and a magazine's edited version of it both record the same conversation. Which is less likely to leave anything out?

7. Answer both (separate your two answers with a comma). 1) A primary source letter written during a war and a modern textbook's summary of that war both describe the same event. Which was written closest to when the event happened? 2) An eyewitness's account and a secondhand retelling of it, two days later, both describe the same accident. Which is more likely to be accurate in detail?

8. Answer both (separate your two answers with a comma). 1) One review calls a film "a masterpiece" and another calls it "a disaster". Do critics always agree? 2) A peer-reviewed scientific study and a newspaper article reporting on that same study both describe a new finding. Which is more likely to include the exact statistical methods used?

9. Answer both (separate your two answers with a comma). 1) A brochure and a scientific report both describe the same national park. Which is likely more objective? 2) A diary entry written the night of an event and a historian's account written fifty years later both describe the same event. Which reflects how it felt in the moment, before later events were known?

10. Answer both (separate your two answers with a comma). 1) A raw data table of rainfall figures and a journalist's article summarising those figures both describe the same month's weather. Which is less likely to contain the journalist's own interpretation? 2) One review calls a film "a masterpiece" and another calls it "a disaster". Do critics always agree?
