✨ Grade 7 English — Critical Reading ✨

Name: Demo Grade 7 **Date:** 26/11/2026

1. During an assembly speech about road safety, should you accept a headline as fully accurate without reading the full article?

2. Answer both (separate your two answers with a comma). 1) Is it wise to compare a claim against information from multiple independent sources? 2) Should you check if a claim has been fact-checked by independent experts?

3. Answer both (separate your two answers with a comma). 1) During a panel discussion about teenage mental health, should you accept a claim just because it is repeated often on social media? 2) During a book club meeting about a mystery novel, should a report that only presents one side of an issue be considered fully balanced?

4. During an assembly speech about road safety, is it reasonable to be more sceptical of a claim with no sources at all?

5. Answer both (separate your two answers with a comma). 1) During a group project on climate change, is an eyewitness account alone always more reliable than scientific measurement? 2) During an assembly speech about road safety, is it reasonable to be more sceptical of a claim with no sources at all?

6. During a workshop about creative writing, should you consider whether a source stands to profit from a claim being believed?

7. During a group project on climate change, is a peer-reviewed journal article generally more reliable than an anonymous online post?

8. During a discussion about the school's homework policy, should you be more cautious about a claim if it is not supported by any evidence?

9. During an assembly speech about road safety, is a government statistics agency generally a more reliable source than an anonymous forum post?

10

Answer both (separate your two answers with a comma). 1) During a negotiation between two sports teams about a shared training ground, is it wise to check whether other reliable sources support a surprising claim? 2) During an assembly speech about road safety, does a large number of social media shares prove a claim is accurate?
