✨ Grade 7 English — Evidence ✨

Name: Demo Grade 7 **Date:** 26/11/2026

1. Which is stronger evidence for "shorter classes improve focus"? "a university study of 2,000 students" or "a single teacher's hunch"

2. Answer both (separate your two answers with a comma). 1) Which is stronger evidence for "literacy rates have improved"? "national exam results collected by the education department" or "a teacher's gut feeling" 2) Which is stronger evidence for what happened at the intersection? "traffic camera footage of the incident" or "a secondhand description from someone who was not there"

3. Answer both (separate your two answers with a comma). 1) Which is stronger evidence for "diet affects mood"? "a long-term survey of 20,000 participants" or "a single online comment" 2) Which is stronger evidence for "energy bills have risen"? "a survey of 5,000 households conducted by a university" or "one neighbour's personal impression"

4. Answer both (separate your two answers with a comma). 1) Which is stronger evidence for "the treatment reduces recovery time"? "a large randomised trial across twelve hospitals" or "one doctor's personal impression" 2) Which is stronger evidence for "the new speed limit reduced accidents"? "official road-safety crash data over ten years" or "a story shared at a dinner party"

5. Answer both (separate your two answers with a comma). 1) Which is stronger evidence for "the climate is warming"? "measurements from weather stations over 50 years" or "someone saying it feels hotter lately" 2) Which is stronger evidence for "the new teaching method works"? "a controlled experiment with a large sample size" or "a single classroom trying it once"

6. Answer both (separate your two answers with a comma). 1) Which is stronger evidence for "injuries have increased"? "official hospital admission records" or "a rumour heard at the gym" 2) Which is stronger evidence for "the population has grown"? "government census data" or "a guess based on a walk through town"

7. Answer both (separate your two answers with a comma). 1) Which is stronger evidence for "the water is contaminated"? "a peer-reviewed scientific study" or "a comment on social media" 2) Which is stronger evidence for "the product is effective"? "data collected by independent researchers" or "a claim made by the product's own advertisement"

8. Answer both (separate your two answers with a comma). 1) Which is stronger evidence for "sales have grown this year"? "verified sales figures reported to regulators" or "a company spokesperson's confident claim" 2) Which is stronger evidence for "the water is safe to drink"? "independent lab testing of the water supply" or "a post on a local community forum"

9. Answer both (separate your two answers with a comma). 1) Which is stronger evidence for "the treatment reduces recovery time"? "a large randomised trial across twelve hospitals" or "one doctor's personal impression" 2) Which is stronger evidence for "literacy rates have improved"? "national exam results collected by the education department" or "a teacher's gut feeling"

10. Answer both (separate your two answers with a comma). 1) Which is stronger evidence for "literacy rates have improved"? "national exam results collected by the education department" or "a teacher's gut feeling" 2) Which is stronger evidence for "a treatment works"? "a peer-reviewed meta-analysis of 50 studies" or "one person's personal experience"
